A full-day curated reading of Bucharest's most resonant landmarks through the classical Feng Shui lens — from the imposed mountain of the Parliament Palace, through the Stavropoleos Monastery and the inner courtyard of Hanu' lui Manuc, to the neoclassical dome of the Athenaeum and the vernacular wisdom of the Village Museum.

Carpathian Dragon - Landform · Sinaia · Bușteni

Cantacuzino terrace · the Bucegi dragon

The Peles castle ·

A twelve-hour journey into the heart of the Carpathian Dragons, where King Carol I chose Sinaia for to build the Peleş Castle and where the Cantacuzino family — descendants of Byzantine emperors — built their summer residence at Bușteni with the southern facade open toward the Bucegi peaks. Both castles serve as living textbooks of classical Form School Feng Shui.
